

RFP 2011-14: Non-Domestic Prescription Mail Order Program

Questions and Answers (12/9/11)

1. We were looking for clarity regarding the prescribing issues and drug data set included as an attachment.

Answer: The City does not believe that any further information would be pertinent to any of the potential vendors submitting proposals. The City is seeking a combination of pricing and services appropriate for the City's needs and the City believes that the data provided gives all vendors an equal opportunity to respond to the RFP. If you wish to offer guarantees that the circumstances you believe are occurring either could not or would not happen if you were the vendor then that should become part of your proposal.
